Cold							

No Impacts

Minimal Impacts

Moderate Impacts

Severe Impacts

WEATHER KEY POINTS

04/30/22 - 05/06/22

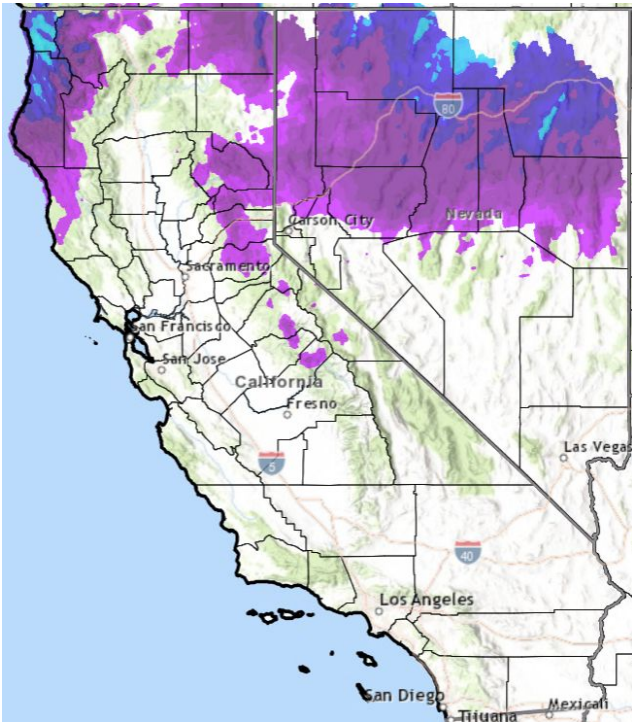

Saturday- Friday

- Minor heat impacts will continue across primarily Southern and Inland regions through much of the week
- Most of the state will remain dry through the next week, but a series of storm systems will bring periods of primarily light precipitation to far northern California
 - The best periods of precipitation along the Oregon border currently look to be on Saturday, Monday, and Thursday
 - Each of these storms will also bring periods of gusty winds to much of the state, though most wind impacts do not appear to be significant
 - The strongest winds will generally be seen across the higher terrain and interior portions of southern California, as well as locally stronger winds in locations such as Santa Barbara County and the Antelope Valley over the weekend

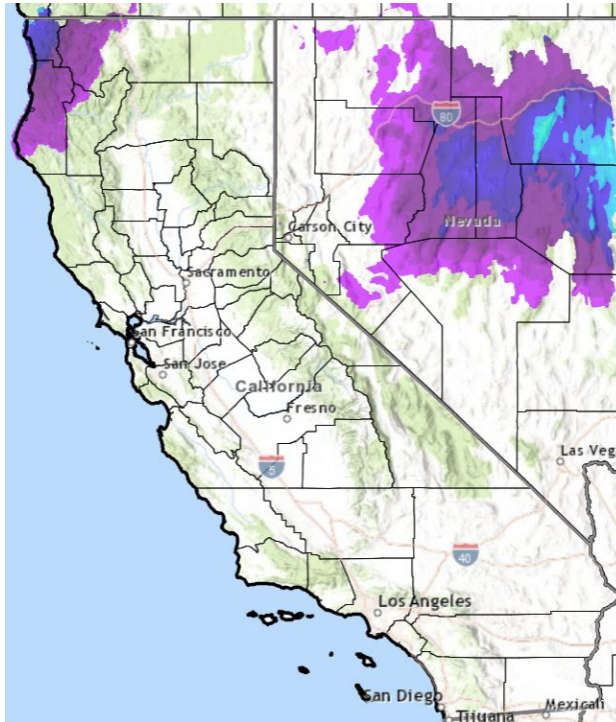

PRECIPITATION FORECAST

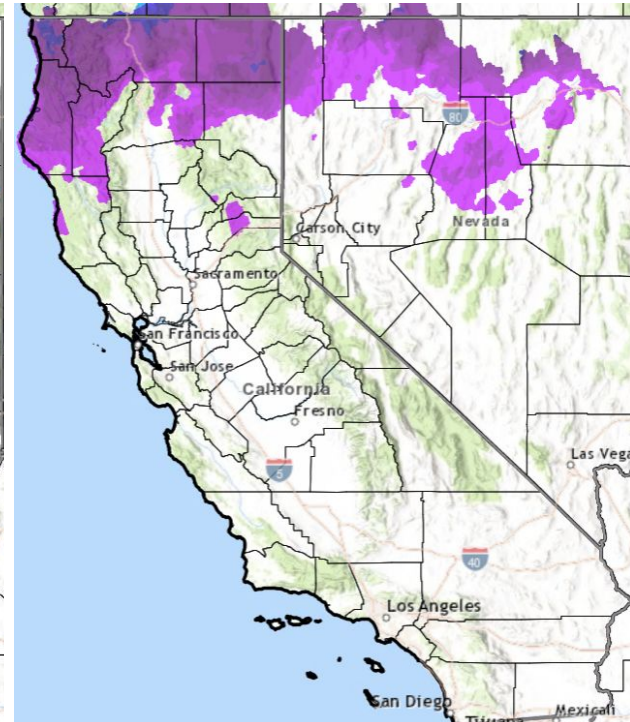

04/30/22 - 05/02/22

Saturday

Sunday

Monday

Note: Forecast precipitation amounts are an average for any particular location. Thunderstorms may produce locally higher rainfall amounts.

Precipitation (inches)

WEATHER OUTLOOK

05/05/22 - 05/13/22

6-10 Day Outlook (May 5 - May 9)

Temperatures

- Below normal temperatures favored for the northern half of the state, with near normal temperatures favored for the southern half of California

Precipitation

- Above normal precipitation is favored for the northern half of the state, with near normal precipitation favored for the southern half of California

8-14 Day Outlook (May 7 – May 13)

Temperatures

- Below normal temperatures are favored for much of the state, except near normal temperatures favored for coastal southern California

Precipitation

- Near normal precipitation is favored for most of the state
